A WORLD **OF** CONNECTIONS

SEA Group

We manage Milan Malpensa and Milan Linate airports connecting people and businesses with the world.

Our airports provide connections with the whole world, fostering Italy's economic growth. We invest in our infrastructure to be competitive and up-to-date.

Our vision

We are shaping the future of Milan Malpensa and Milan Linate with a clear vision: to create state-of-the-art, efficient and welcoming airports where sustainability informs every aspect of our operations.

This process is built around the values that matter most to us: the environment, people, the community, and the region we serve.

Our business

Commercial Aviation

Our business comprises Aviation Business and Non-Aviation Business.

Aviation Business

- Management, development and maintenance of airport infrastructure and facilities.
- Airport security services.
- Aircraft ground operations management.
- Expansion of airline network and growth of those already operating.

Non-Aviation Business

- Allocation of retail and food spaces with the aim of offering a variety of brands and formats to meet the needs of all passengers travelling through Milan Linate and Milan Malpensa airports.
- Real Estate activities.

General Aviation

General aviation includes ground operations and assistance to passengers on private flights at Milan Linate and Milan Malpensa Prime airports.

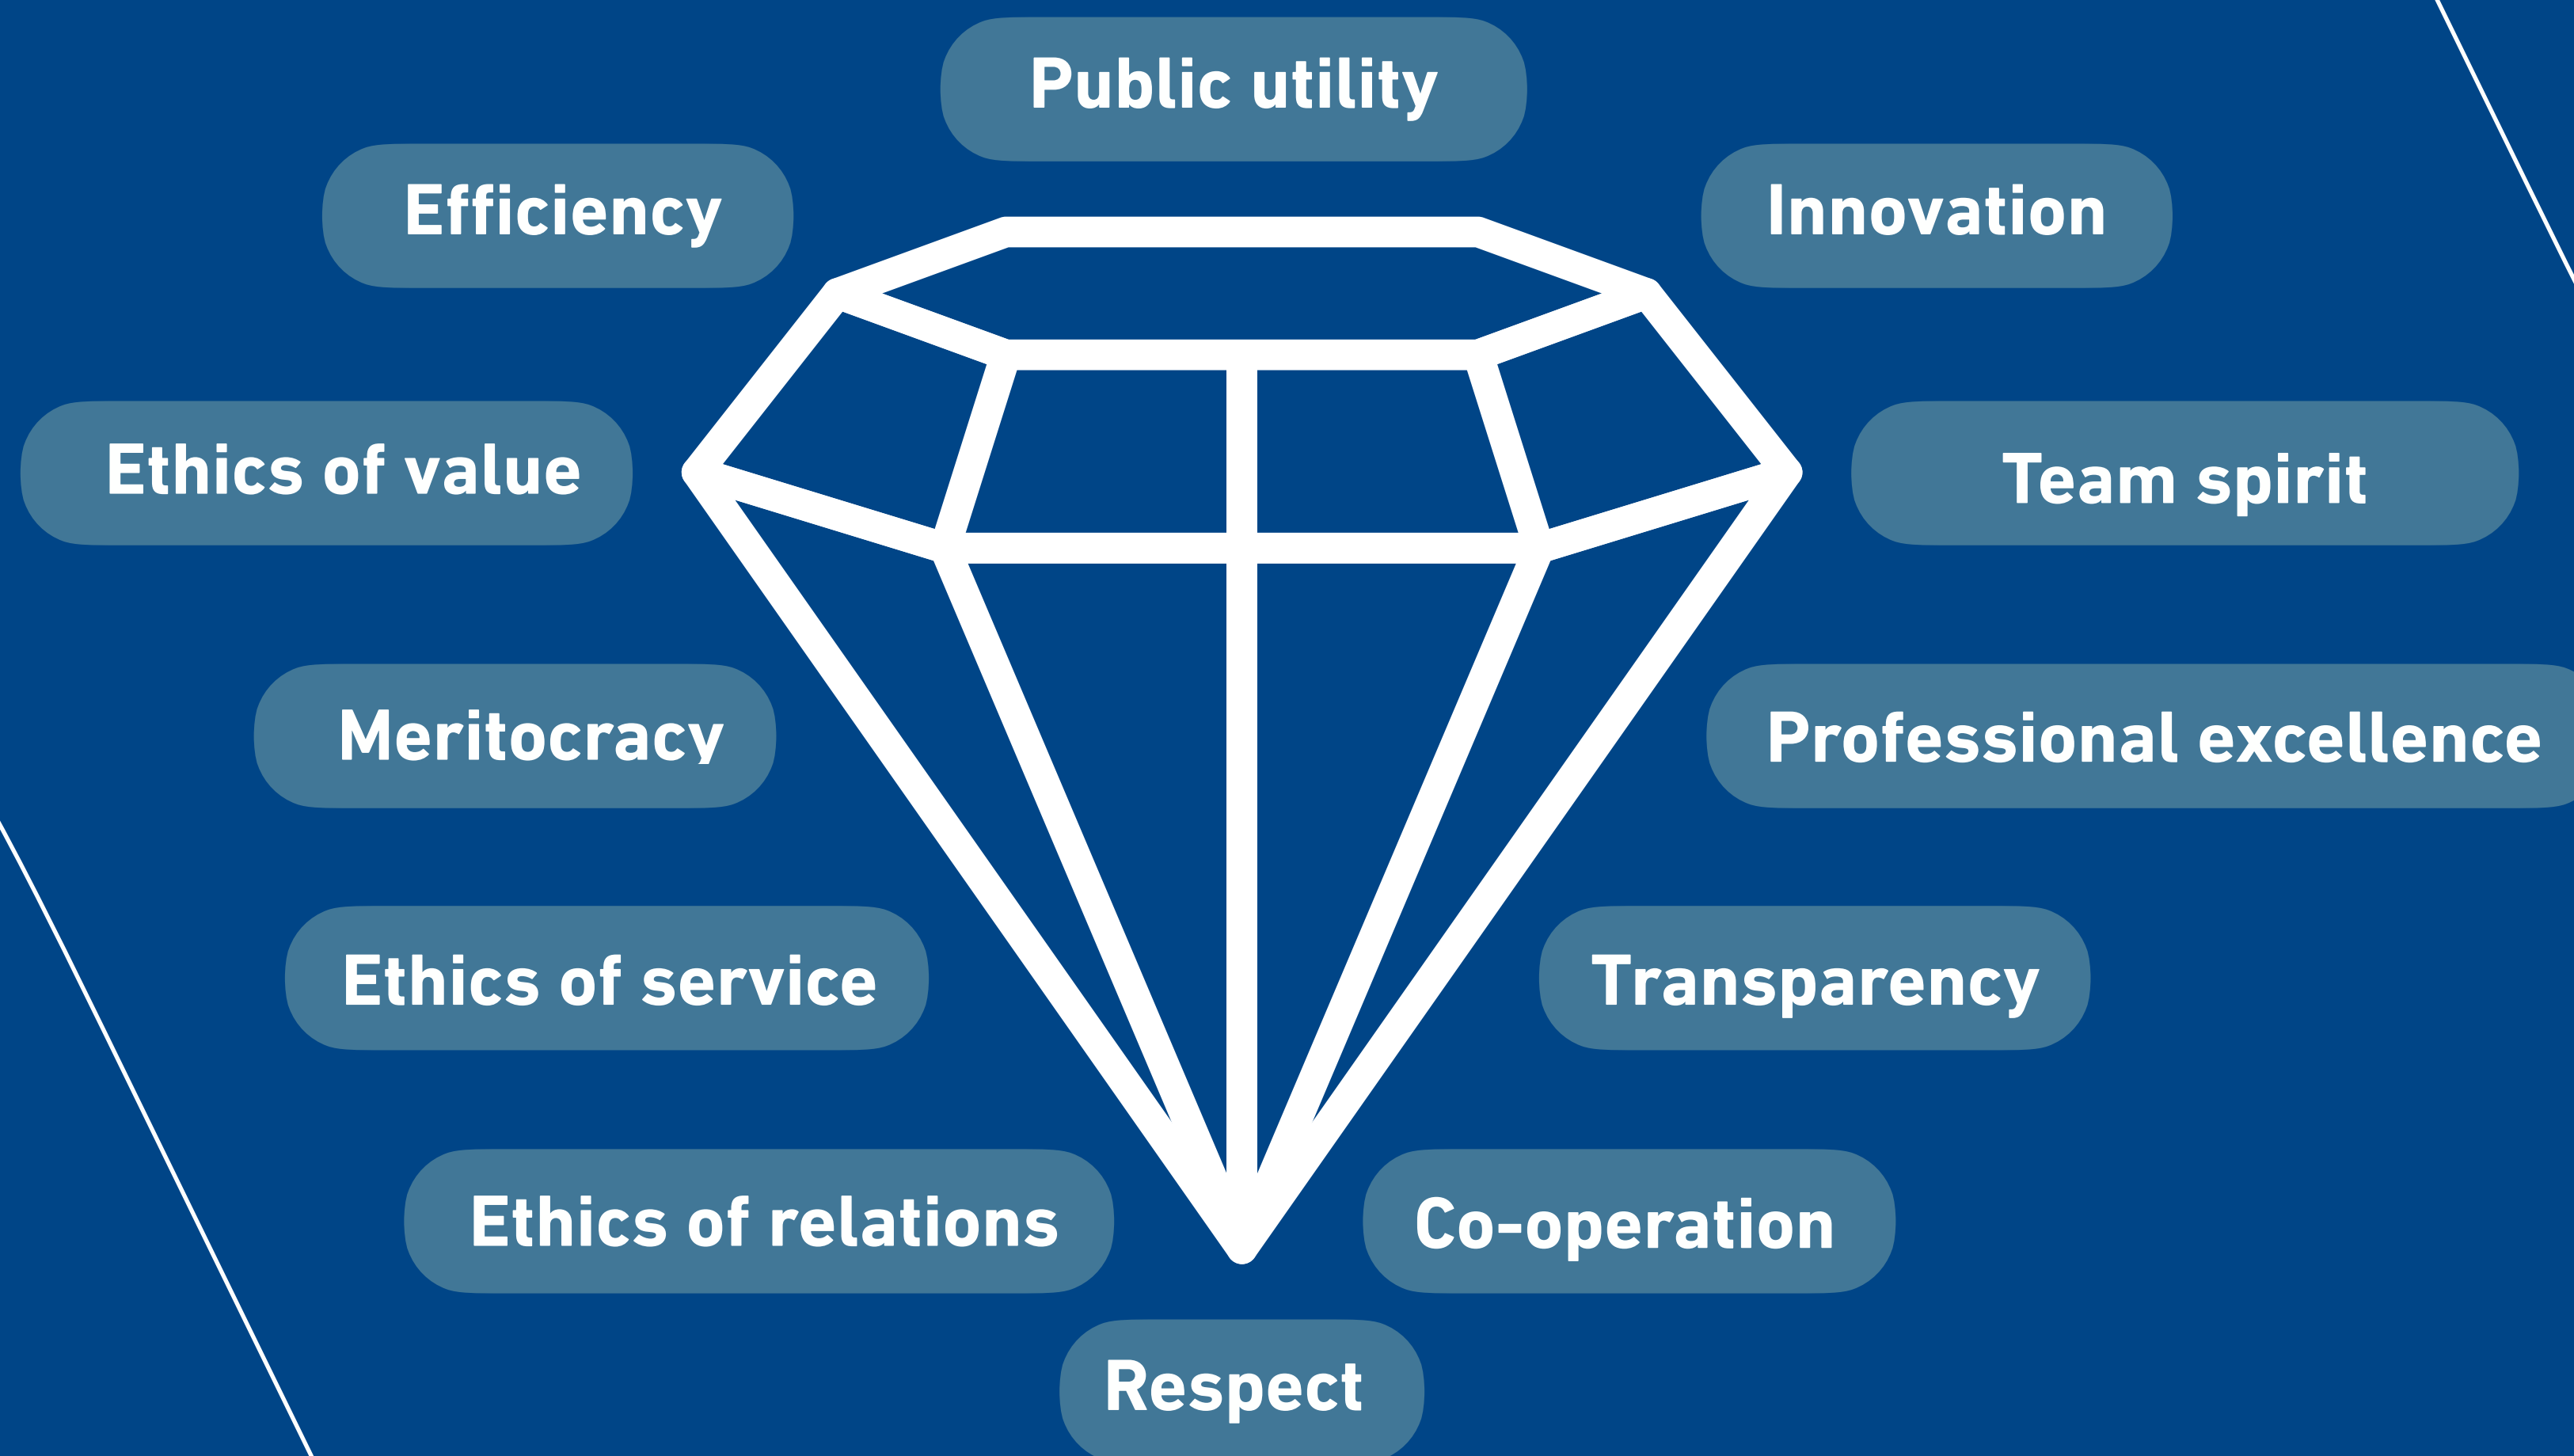

Our values

We aspire to create value for everyone involved in our activities: shareholders, customers and employees. This objective drives our approach to change, enabling us to respond effectively to future challenges and to continue along our path of sustainable, integrated, and inclusive growth.

The values that inspire SEA start here: the Ethics of Value, Service, and Relationships.

Transparent and respectful relationships, professional excellence, and team spirit - elements that foster a climate of trust essential for success. The Diamond of Values guides our mission to manage modern, safe infrastructure that supports national and international accessibility and sustainability.

Milan Malpensa

Milan Malpensa Airport offers an extensive network of direct connections to domestic and intercontinental destinations. It is Italy's second busiest airport in terms of passenger traffic and among the top twenty in Europe. Milan Malpensa is the leading airport in Northern Italy, serving as the gateway to the city of Milan.

Milan Malpensa Cargo

Milano Malpensa Cargo is the leading cargo airport in Italy and among the top 10 in Europe, handling over 60% of national air cargo with more than 700,000 tonnes of freight per year. Located on an area of 500,000 m², it offers global connections to more than 80 destinations served by more than 20 freighters (cargo only), 3 express couriers and a network of 300 forwarders, carriers and customs operators. Thanks to its modern infrastructure and advanced technology, it guarantees efficiency and speed in handling all types of goods.

Comfort, quality and innovation

at the service of the passenger

Our aim is to ensure efficient and reliable operations in a safe and welcoming environment. At the heart of our daily commitment is our focus on passengers, and each of us works to ensure a better travel experience in a modern, dynamic environment. We are constantly looking for innovative, cutting-edge solutions, aiming to maintain the highest standards of excellence.

Sustainability

Milan airports continue their efforts to achieve zero CO₂ emissions by 2030. To reach this goal, we are investing in innovative projects.

GREEN HYDROGEN POWER

We are introducing green hydrogen for fuelling aircraft and non-aviation vehicles. This also includes SEA's participation in the OLGA (hOListic Green Airport) project, approved and financed by the European Commission for the first time at an airport, Milan Malpensa. A hydrogen plant to power both airport vehicles and for connections to and from the airport.

SUSTAINABLE MOBILITY

We are increasingly focusing on sustainable mobility solutions such as trains, electric cars and underground to reach our airports.

SAF FUEL

SEA encourages the use of SAF (Sustainable Aviation Fuel) from plant and waste raw materials also for commercial flights.

U-ELCOME

We are working with local stakeholders on the use of drones to transport goods, e.g. medicines.
