

## GROUND SAFETY RECOMMENDATION

### AMBULIFT

Le AMBULIFT in fase di attracco/distacco, oltre ad avere punti ciechi per l'operatore a bordo, modificano il proprio ingombro diventando potenzialmente pericolosi per i mezzi e le persone nelle immediate vicinanze.

- ✓ Mantieni sempre una adeguata distanza di sicurezza specie quando il mezzo è in configurazione estratta.
- ✓ Se hai necessità di avvicinarti informa l'equipaggio dell'AML per garantire la sicurezza di entrambi.

# Be safe at all times!

Ground Safety Recommendation  
49 – 2023

## GROUND SAFETY RECOMMENDATION

### AMBULIFT

AMBULIFTS during docking/undocking, as well as having blind spots for the operator on board, change their footprint and become potentially dangerous for vehicles and people in the immediate vicinity.

- ✓ Always maintain an adequate safety distance especially when the vehicle is in an extracted configuration.
- ✓ If you need to get closer, inform the AML crew to ensure the safety of both.

# Be safe at all times!
