

ROAD SYSTEM AND PRECEDENCES**Remember that:**

- From the cockpit of an aircraft, the perspective is quite different than those on the ground; before committing to a crossing point, ensure a minimum distance of 200 meters in front of an aircraft.

**Aircraft always have the right of way:**

- with anticollision lights turned on;
- moving or about to move;
- during push-back maneuvering or towing;
- preceded by follow-me.

Please ensure this GSRec is prominently displayed within your workplace (Safety Corner)
