

GROUND SAFETY RECOMMENDATION

HANDLING EQUIPMENT DUMP ELEVATING

Remember that:

- the approach maneuver must be performed with the support of manual signs by a ground operator;
- the lowering maneuver of the dump platform must be controlled by a ground operator;
- any reverse operation must be performed with the support of manual signs by a ground operator;
- the platform transition must be stable and equipped with side protection;
- during strong wind conditions higher than expected from the technical specifications, the platform should never be relieved;
- who works near the vehicles with dump raisable, either on foot or driving other equipments, must be kept at a safe distance and never stand below the platform's movement area.

Make sure that GSRec is clearly visible at your workplace (Safety Corner)
