

GROUND SAFETY RECOMMENDATION

Stairs Positioning on the airport Apron at LINATE

Stairs wrongly positioned does not permit the correct view of the aircraft moving out of the parking area to those operators driving on the airport apron

1. After being used on remote stands, stairs must be positioned inside the 'Equipment Parking Area' (EPA) perpendicular to the yellow line (Aircraft Lead-in)

2. Do not position stairs just before the dotted line that outlines the way: stairs must be positioned inside the Equipment Parking Area (EPA) at least 3 metres away from Apron Border Line (ABL)

A lot of missed priority to Aircrafts moving on the airport apron are due to this "bad practice"

The Ramp Agent must ensure that stairs are positioned in a correct way

Be safe at all times!
