

GROUND SAFETY RECOMMENDATION

Cellophane collection trolleys

FOD Risk

In order to contain FOD risk in Malpensa Apron specific trolleys have been prepared for the collection of cellophane actually used to cover pallets (double cellophane)

Remember that:

- Trolleys are available to all operators just for the storage of cellophane, it's forbidden to use them for other purposes.
- Trolleys are equipped with a special stick to be used to shrink the polyethylene sheets inside, correct use of the stick is recommended.
- The Airport Operator will remove the content and return the containers to normal availability.

Trolleys Placement

- T1- south Cargo in front of Alha area
- T1 in front of V.V.F building.

Caution:

Trolleys can not be removed from their position, operators will carry cellophane to the identified areas.
